

# CCINW Meeting

## Rug Cleaning Plant Tour

The D. A. Burns cleaning shop is a great example of a high volume cleaning operation. With a moving bed compression roller washer, automated rug hanging system, temperature controlled dry room and dust and sand removing equipment, the Burns crew can clean dozens of rugs per hour.

Of course there are many hours of pre and post-wash work, and not every rug can be washed. Come see an actual wash in process and find out what else goes into area rug care.

This meeting will be limited to CCINW members and their guests.
